Shaurya Singh Rathore

+91 89574 05758 | ssr030305@gmail.com | linkedin.com/in/shaurya-rathore | github.com/Pandacoder0011

Summary

Full-stack engineer who has shipped three deployed web apps on the React / Node.js / Socket.io stack and authored an IEEE-format research paper benchmarking six NLP architectures. 100+ problems solved on LeetCode and HackerRank; comfortable owning a feature from API design through deployment.

Education

Manipal University Jaipur — Jaipur, Rajasthan
B.Tech in Information Technology; CGPA: 6.94/10 — *2023 – 2027*

Delhi Public School, Varanasi — Varanasi, U.P.
Class XII: 76.4% Class X: 81.8%

Projects

SmartOps AI | *React, Node.js, Express.js, RESTful APIs*

- Architected a full-stack, AI-powered operations platform with secure user authentication and a protected dashboard, deployed live on Vercel
- Built a RESTful API layer connecting a React frontend to a Node.js/Express backend, integrating AI-driven features to surface operational insights
- Code · Live Demo

Real-Time Multiplayer Chess | *React, Node.js, Socket.io*

- Engineered a real-time two-player chess application with a React/Tailwind CSS frontend and a Node.js backend, using Socket.io for live move synchronization
- Implemented move validation and cross-client game-state syncing, deployed live on Render with consistent rendering across devices
- Code · Live Demo

Real-Time Device Tracking | *Node.js, Express, Socket.io, Leaflet*

- Built a real-time location-tracking system that streams live device coordinates onto an interactive Leaflet map via the browser Geolocation API
- Used Socket.io over WebSockets on a Node.js/Express backend to push position updates instantly to all connected clients
- Code

Gym Flex – Gym Management System | *JavaScript, Tailwind CSS*

- Designed and built a responsive, mobile-first gym management web app with clean UI components and smooth navigation, deployed live on Netlify
- Code · Live Demo

Research

Comparative Analysis of Classical, Hybrid & Transformer Models for Sentiment Analysis — 2025
Sole Author · IEEE Conference-Format Research Paper

- Benchmarked six NLP pipelines spanning classical, hybrid, and fine-tuned transformer architectures on the 1.6M-sample Sentiment140 dataset, implemented in Python with scikit-learn, XGBoost, and Hugging Face Transformers
- Fine-tuned BERT to the top result of 73.9% accuracy and 0.831 ROC-AUC, quantifying the accuracy-versus-efficiency trade-off across all six models via ROC-AUC, MCC, and Cohen's Kappa

Technical Skills

Languages: Python, JavaScript (ES6+), Java, C, C++, SQL, HTML5, CSS3
Frontend: React.js, Redux, Tailwind CSS, Responsive Web Design, HTML5/CSS3
Backend: Node.js, Express.js, RESTful APIs, Socket.io
Databases: MongoDB, SQL
AI/ML: Machine Learning, NLP, Transformers (BERT), Model Training & Fine-Tuning, scikit-learn, XGBoost, Hugging Face Transformers, Feature Engineering (TF-IDF), Model Evaluation (ROC-AUC, F1, MCC)
Data & Tools: Pandas, NumPy, Matplotlib, Jupyter, Data Analysis & Visualization
Developer Tools: Git, GitHub, Vercel, Render, Netlify
Concepts: Data Structures & Algorithms, Component-Based Architecture, UI/UX Fundamentals, Problem Solving

Achievements & Certifications

Hackathons: Adobe India Hackathon – Advanced past Round 1 (online MCQ + coding round) with Team Tren, MUJ, via Unstop (Aug 2025) · Turing Hacks 2.0 – Finalist · Tata Elxsi TELIPORT Season 3 – Certified Participant (2025) · Government of India Cybersecurity Cell Hackathon – Participant

Courses: Fundamentals of Database Engineering (Hussein Nasser, Udemy) · Mastering System Design (Rahul Rajat Singh, Udemy) · Introduction to Cloud Computing (Xavier Corbett, Udemy)
